

SONY PICTURES ENTERTAINMENT BACKSTAGE THEATRE - 3D SCREENING ROOM

Location: Sony Studios, Culver City, CA
Contact Person: Peter Wowkowych, AIA
Project Manager: Richard Berliner
Construction Budget: N/A
Date of Construction: 2011
Size of Project: 1580 SF Interior Renovation

The Backstage Theatre-3D Screening Room Project expanded the existing film projection room to integrate the latest 3D digital projection technology. Considerations for structural, mechanical and acoustics performance, as well as the building's historic designation established the basis of this design. The scope of the work also included the renovation of an adjacent 102 seat screening room and ADA upgrades.
